

PLATFORM FOR THE MODERN GOLFER

aboutGOLF®

YOUR HOME COURSE

aboutGOLF is dedicated to the integration of technology and golf. All of our designs are custom built for every client. View a rendering before construction begins and work closely with our design team to build your own experience. Your home is like no other—customize your aG platform to be equally unique with additional courses, games, analytics tools, high-tech features, and more. Improve your game with the latest in entertainment.

STEP 1: PICK YOUR FACILITY

CLASSIC

The high resolution 12'x 9' image is perfect for golfing, gaming, and other multimedia. 15' W x 11' H x 19' L min.

WIDESCREEN

Entertainment is taken to new heights with the stunning widescreen image and features. 17' W x 11' H x 19' L min.

IMPACT

Completely flexible to your space—made possible by a double-sided hitting configuration. 12' W x 11' H x 19' L min.

CURVE

The Curve features a scalable Picture-in-Picture, allowing players to golf along with the pros. 21' W x 12' H x 19' L min.

UNBEATABLE ACCURACY WITH 3TRAK

aboutGOLF Simulators are powered by 3Trak®; aboutGOLF's patented, three-dimensional, high-speed camera and tracking system. 3Trak® machine vision technology extracts every bit of usable data from dozens of images per shot. It provides accurate ball and club data on any type of shot regardless of speed, spin or launch angle. The shot is then replicated in the simulator using advanced flight and terrain physics allowing you to see and play the shot as if you were outdoors. The result is the most realistic indoor golf experience possible.

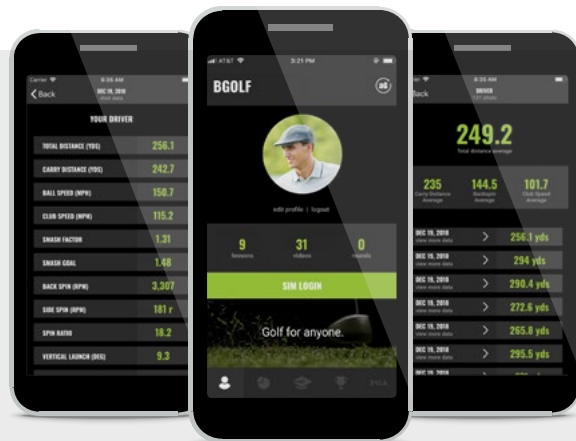

IMPROVE YOUR SWING WITH AG FLIX

aG Flix is a world-class video recording system that incorporates up to five color or monochrome cameras that simultaneously record your swing. aG Flix creates an unparalleled indoor instruction and video environment that does not wash out the simulator's projected image. Now it is possible to see your shot shape and performance indoors while also reviewing high speed quality color images of your actual swing.

AG BALANCE MEASUREMENT SYSTEM

aG Balance is the world's leading golf balance and weight measurement system. Using a platform that is hidden under the playing surface, the technology independently measures the weight of each foot in real time as it shifts during the swing without influencing the golfer's environment. This technology is used by leading instructors around the world to help the very best golfers improve and understand their game.

ANYWHERE, ANYTIME WITH AG DATA

Create an online profile where all shots, scorecards, videos, and data are automatically uploaded to your private locker in the cloud. Now golfers can efficiently use their time on the simulator to practice, and analyze their data from the comfort of their home on the aboutGOLF website (agdata.aboutgolf.com) or the aG Locker app. Online lockers can be even used by instructors to remotely review progress and provide guidance.
